frondosa, and Lentinus edodes***
extracts supports our natural
defenses.

Top seller product

4LIFE® TRANSFER FACTOR™ **PLUS™**
TRI-FACTOR™ FORMULA

How does the immune system help you on a daily basis?

Through external mechanisms (skin and mucous membranes) and internal (white blood cells), it allows us to defend ourselves against threats such as viruses, bacteria, fungi, etc. If the immune system works properly, our body will be able to prevent infections and colds. It will also enable us to enjoy better health, our family, work, and leisure time. Healthy habits are the great allies of our defense system: eating in a balanced way, being physically active, resting, sleeping enough hours, and reducing stress.

What does 4Life Transfer Factor Plus offer?

- Zinc contributes to the normal functioning of the immune system.
- The exclusive combination of aloe vera (*Aloe barbadensis*) and mushroom extracts (*Agaricus blazeii*, *Grifola frondosa*, and *Lentinus edodes*) supports our natural defenses.
- 100 mg of 4Life Tri-Factor Formula per capsule.
